

# Endavo Media Management System (EMMS) – Release Notes

Release Date: March 17, 2025

This release focuses on improving financial integrations, enhancing system performance with React migrations, restoring social sharing functionality, and upgrading system monitoring.

## New & Updated Features

### **Platform Fee Sync with Stripe**

When the Platform Fee % is updated, all active Stripe subscriptions are now automatically adjusted to reflect the new rate.

### **External Syndication on React**

The External Syndication interface has been migrated to React for a faster, more responsive, and mobile-friendly experience.

### **Twitter (X) Clip Sharing Restored**

Sharing video clips directly to Twitter (X) now works again after resolving a platform integration issue.

### **Improved Wowza API Logging**

Enhanced logging for Wowza API calls, making system monitoring and troubleshooting more effective.

If you have any questions about these updates or would like assistance using the new features, please contact our support team.
